PROFESSIONAL PROFILE

High-achieving Computer Science student at NUST (Upper Second Class — 69.32% | GPA 3.3) with internationally recognised cybersecurity credentials and hands-on experience in AI-driven workflow automation and data analysis. Combines a strong mathematical and systems foundation with practical exposure to enterprise security analysis, AI tools, and structured data reporting. A natural communicator and fast learner who is analytical, methodical, and proactive - equally comfortable working independently or within multidisciplinary teams. Seeking industrial attachment opportunities in Data & ICT, Cybersecurity, or Data Analytics to apply and deepen these skills in a professional environment.

EDUCATION

BSc Honours in Computer Science (In Progress) | National University of Science & Technology (NUST), Zimbabwe
Upper Second Class (2.1) · Cumulative Average: 69.32% · GPA: 3.3 / 4.0

Distinction / Near-Distinction Results:

- Mathematics: Calculus (87%) · Discrete Mathematics (77%) · Research Methods (81%)
- Systems: Computer Architecture & Organisation (79%) · Structured Systems Analysis & Design (75%)
- Programming: Principles of Programming Languages (83%)
- Other: OO Software Development (70%) · Data Structures & Algorithms (68%) · Database Systems (65%)

CERTIFICATIONS

-
- Southern Africa Netherlands Cyber Security School (SANCS), 3rd Edition - The Hague Centre for Strategic Studies, Stellenbosch University & Netherlands Ministry of Foreign Affairs | April 2026
 - Introduction to CyberSecurity - Cisco Networking Academy
 - AI Workflow Automation Analyst - Vista Equity Partners via Forage | March 2026
 - Cybersecurity Virtual Experience - Mastercard via Forage | March 2026

TECHNICAL EXPERIENCE

AI Workflow Automation Analyst | Vista Equity Partners (Forage Simulation) | March 2026

- Engineered repeatable GenAI workflows for data aggregation and reconciliation using ChatGPT and Microsoft Copilot, gaining hands-on experience with AI-driven data pipelines.
- Applied structured prompt engineering framework to synthesise NPS survey data into executive-level reports, translating complex datasets into clear, actionable insights for stakeholders.
- Implemented quality-assurance guardrails improving AI output accuracy by over 50% and reducing error rates, demonstrating rigorous validation methodology.

Cybersecurity Analyst | Mastercard (Forage Simulation) | March 2026

- Assessed enterprise security architecture across a global financial institution, identifying systemic vulnerabilities and producing prioritised remediation recommendations.
- Developed security awareness training documentation and procedures to strengthen organisation-wide security posture across multiple business units.
- Translated complex technical threat findings into clear, actionable reports for non-technical stakeholders, demonstrating strong communication and analytical skills.

TECHNICAL SKILLS

- Cybersecurity: Threat Detection · Vulnerability Analysis · Security Architecture Review · Network Security · Cisco Networking · Information Security Principles
- AI & Automation: Prompt Engineering · LLM Workflow Design (ChatGPT, Copilot) · Output QA & Validation · AI-assisted Data Processing
- Data & Analytics: Data Collection & Organisation · Quality Assessment · Research Synthesis · Report Writing · Dashboard Review
- Systems & Infrastructure: Computer Architecture · Database Systems · Data Communications & Networking · Software Engineering
- Programming (Foundational): Python · Object-Oriented Principles · Data Structures & Algorithms · SQL (academic)
- Tools: Microsoft Office (Word, Excel, PowerPoint) · Research Platforms · Documentation Systems

PROFESSIONAL SKILLS

- Analytical & methodical approach to problem-solving
- Strong written and verbal communication - able to translate technical findings for non-technical audiences
- Self-directed and proactive - demonstrated through independent certifications and professional simulations alongside full academic load
- Fast learner - comfortable adopting new tools and technologies quickly
- Cross-cultural communication - experienced working across diverse, international contexts

ADDITIONAL INFORMATION

- Languages: English (Professional) · Ndebele (Native) · Shona (Conversational)
- Completed: Ethics and Professionalism in Computing
- Interests: Cybersecurity · Generative AI · Data Analytics · Algorithmic Optimisation · Semiconductor Technology
